

Paper Reading Questions

For each paper, your assignment is two-fold. By 10PM the evening before lecture:

- Submit your answer for each lecture's paper question via the submission web site in a file named `lecn.txt`, and
- Submit your own question about the paper (e.g., what you find most confusing about the paper or the paper's general context/problem) in a file named `sqn.txt`. You cannot use the question below. To the extent possible, during lecture we will try to answer questions submitted the evening before.

Lecture 9

After you have read about Django's security mechanisms, think back to “The Tangled Web”. What security pitfalls still remain for developers using Django? Could you extend Django to help developers avoid those pitfalls, in a style similar to Django's existing protections?
